Introduction

Welcome to my personal portfolio repository! This project serves as the codebase for my portfolio website, where I highlight my skills, projects, and experience.

Features

- Responsive design for optimal viewing on various devices.
- Projects section to showcase my work.
- About me and Contact pages to provide more information about myself.
- Animated components like the Typewriter Effect and Wavy Background for a dynamic user experience.

Technologies Used

- [React](#) - JavaScript library for building user interfaces.
- [Next.js](#) - React framework for building server-side rendered and statically generated web applications.
- [Tailwind CSS](#) - Utility-first CSS framework.
- [Framer Motion](#) - Animation library for React.

Getting Started

1. Clone the repository:

```
git clone https://github.com/aknsubbu/portfolio-animated.git
```

Install dependencies

```
npm install
```

Run the development server

```
npm run dev
```
